Doc Version: 1.0

Author: Pixor

Author URL: www.pixor.it

Thank you for purchasing this plugin. For any issues please leave a comment on envato website and I will do my best to solve your problem. I am planning to improve this plugin and add new features in the future.

Installation

You can install the plugin in two ways:

1. Download the zip file and in WordPress (WP) go to **Plugins → Add New → Upload** and select file and install plugin.
2. Unzip the content of the zip file to wp-content/plugins directory and then on WP back-end "**activate**" the plugin.

Once the plugin is activated

Go to **Plugins → Installed plugins** and you should be able to see "**EventON Slider Addon**" plugin installed.

You can access the admin area by Wordpress menu by go to: myEventOn → Slider Addon

Important:

1. For insert multiple sliders on same page every slider must have a different ID
2. Slider ID and other shortcode attributes must not contain – char.
3. Google maps work only by Event Address, not yet work by longitude and latitude.
